# FIND NEW ORE

#### Sulphide Body, More Than 40 Feet New Ground in Old Phoenix Shaft Wide, Is Encountered

The important news of developme touch with a new strike that has been present showing is all that the most to altometic and occine promecting that grown until the drift is now better than forty feet in the ere, enthususen the are and the character of the formaxion in which it is found. Purthermore, there does not appear to be it not going to you into a veryble find. R may have bearing of hig value upon large area of country in the Cole ter-lited the mine this week and a lot of district, for it is found in a lime that has not been much, promoted and about which there has been some

#### Came as a Surprise,

The ore is sniphide and lies north o the Cole exides. They gan into it while prosecuting some small work over that way, in connection with which there was no intention of entering the lime While looked upon as a possibility of The ore showing encountered lookes decided to follow up and see. The resuff have abundantly awarded the curlosity, for the ore body that has been brought in, although a surprise has already demonstrated that it is valuable presumion. From the present end of the forty feet of work that has been done in the ore, there is a drift fifty feet away in which they are work ing in the same ore. It is all an excellent grade of sulphides and very ac-

#### No Realization of Wealth.

This strike occasions recurrence to mind of the remark which is every once in a while found to be worth while in high C. & A. official circles, to the effect that even there, not to men tion the rank and file of owners in the tockholders' list who cannot possibly heep anywhere as near up with the developments, there is only scant realization of the tremendous resourcefulness and worth of the properties. This of development, but because only through personal importion of the ore bodies can there be gained any idea of their great extent and value. And there are new bodles, as in this Cole case coming up with such frequency that i may be fairly said the properties of the company in the district are never without them. There is niways something new doing. No one may keep full track of the development and energy the full resilication of the value being made to which the work is entitled.

## BROKERS' GOSSIP

#### Homestake.

The Romentake Mining Co. has de-clared a regular monthly dividend of 65 nents; payable they 25th;

## Mohawk

Melinivir may resome dividend next menth with a disturbement of \$1 a store. The company has reome be well that me Jone production was the greatest space Centler, 1912. Monows started the surrent year with a they Consolicated surplus of \$521,060, which has been Superior & Hoston .... 1% angmented to some extent by submequent operations

#### Isla: Royale.

Tale Reyale howan this week to shiprock to the Centennial-Allower mill. This has been expected for some time as the production has been fleeding the fale Boynie mill me the line three months. So much development work Weundot ...... has been done for the past two are -half years and is labor continues ist the present time that the number of available stopes of soud ground it community increasing of course the most records at a heige broken very fact and it is probably a fact that within a period of from one to two years at stame, double the number at the old mill, if not more, will be required. Another fact that is very encouraging is the return of the yield green lodes on the son level has passa ton, which fell off from 16.4 pounds od through No. 1 lode and for eighteen in 1912 and 15.4 in 1912 to 13.2 in 1913, free the vent was very tich, even betand which for the current year so far !is buck to the earlier flaurest. The by the small, Drifting will be started great decrease was due to the great the coming week and million arrange amount of development work and comparatively small amount of stoping, Argona's combined production for With an increase in the latter, on in- June was 2,315 tons. Hancock is shipcrease in the yield will follow and ping at the present a little over 250 probably within a year or so new records will be established and consequantity the coats excluding there of 900 feet the coming week. onerruction will be decreased, a reduction that will be made greater by means of the gradual rise in production. The costs for 1915 of 11.86 cents should be taken as a criterion rather than those of 1913 of 18.81, as this

MICHIGAN COLLEGE OF MINES F W. McNair, President Year Book Apply to President or Secretary, HOUGHTON, MICHIGAN.

spenses of the strike. The only cor druction cost for this year of any im ortance will be that of retimbering No. 1 shaft, and this will not be larg IN COLE SHAFT and will greatly aid in the increase of

#### FINE COPPER SHOWING.

## Away Above Expectations.

For the last ten days there has bee great improvement in the rock coming from the bottom of the Old Phoe nix shaft of the Keweenaw Copper company, and although the showing before that time was satisfactory, the ontimistic friends of the property ould wish for, says the Keweenaw

The shaft is new down to a depti of 530 feet, and in virgin ground The drift running in the direction of Crestview is also in virgin groun and the rock coming out from both Whaft and drift chuck full of coppe of a shotty nature and not flaky lile Astrhed lode in this county.

Where this flaky copper has shown up much is generally in the vicinity of fine little cross fissures.

A representative of the Miner vis hoisted to surface, and he went to the bother of breaking a large num ber of large pieces of rock, probably fifty in all, and every one but on had copper well disseminated through it. At that he was not looking for the best pieces, many that he did no attempt to break showing copper al

The management of the Keweenny copper company is to be congrutulated upon the really fine showing in this shaft, for with the possible exention of the rock coming up at Ahvery good and encouraged curiosity as meek, there is not another mine in to what might be further on. It was the district that has a better showing at the present time.

#### CENTRAL MINE REUNION.

girl's race.

Bishop Leete of Atlanta, Georgia, to

Deliver Sermon August 2. August 2 has been definitely decided pon as the date of the annual Cenrai Mine reunion, and the committee in charge of that event amnounces that Rishop F. D. Leete of of Atlanta, Georgia, one of the foremost Metho dist clergemen in the country, who plans to spend his vacation at Mackinac Island this year, will deliver the sermon. Bishep Leete will be one of the speakers at the Copper Country M. E. Chautaugua at the Electric park the last week in July and this fact enibles him to arrange his schedule so as to attend the Control reunion.

The Keweenaw Central road will provide a special train service for the reunion and there is little question that the gathering will be fully successful as those which have been held in other years, if not more so,

The reunion is in no sense a pienic It is a simple gathering of former residents of the Central Mine, in the old Methodist church at that place, where some of them were christened and others were married, for religious worship. Following this service, dinner will be enjoyed and the remainder of the day spent in visiting old familiar scenes and renewing acquaintan-

#### NEW YORK ANARCHISTS CALL OFF FUNERAL PARADE

New York, July 11 .- No attempt was ade by anarchists today to hold the proposed funeral parade in honor of the men who were killed in the bomb explosion last Saturday. The Anti-Militarist league and the Mother Earth to call off the parade, rather than antagonize the police.

#### BANK DECLARES DIVIDEND.

The Keweenaw Savings bank of Moawk last week declared a regular unrierly dividend at a rate of eight per cent per annum, being the total of dividends paid up to 28 per cent, in addition to which undivided profits have been accumulated in the surplus fund amounting to fifty per cent.

#### UNEXPLORED REGIONS

It is commonly supposed that hitle unexplored area is left on the carth' surface, save in the polar regions, and that adventurous men like Theodor Roosevelt will soon find nothing lef to discover. But if one looks up th unexplored regions of the earth, it i found that there is work still left for the explorers. Alaska has an unknown section as big as New Englan-There are imexplored regions i South America. Asia and upper Canida as big as California or Texas.

The Sahara desert of Africa was for merly a great splotch of white on the maps. It was regarded as valueles It was long argued as a feasible pro-Further exploration showed the absurdity of this theory; by demonstrating that it has mountains a mile high with much elevated tableland. In this upposedly valueless tract there are great cases, one of which alone has 1,000,000 date palms. Considerable areas can be made productive by planting with course grasses and tenacion varieties of trees.

The worldwide search for rubber is eading to further search in South American wilds. Perhaps the Roosevel party may have found it. Very likely better knowledge of South America may yet reduce the high price of automobile tires, and make it possible to sell rubber overshoes having some

substance, It is a costly matter to fit out expeditions to explore these wilds. The results are uncertain, and the governments of the world are not much inclined toward it. The work depends on the scientific curionity and love for adventure shown by such men as Mr. Roosevelt. There will be much interest to learn whether his expedition which has just reached the sea coast has found resources of value to the world,-Pontlac Press-Gazette.

THE CAUSE OF HUNGARY.

Count Michael Karolyi, leader of the Independent Party in the Hungarian parliament, is in New York city, at the head of a deputation, all members of parliament, who, he says, mive come to seek in America moral support for democracy in Hungary.

The men with him are Bela Barabas Stephen Zlinsky, Dr. Andreas Rath, Lebel Hederyray, Barna Buza and Soma Viscontal.

Coming up from quarantine, Count Karolyi said be had been shocked when he read the wireless message on ling. the bulletin board saying that the Archduke Francis Ferdinand and the Archduchess had been assassinated.

"I am sorrier than I can say," the Count continued. "It is a great loss to our party, and I am afraid it will be a setback to our cause. The late Archduke was very sympathetic with the people, and he would have been much more liberal if he had lived to succeed to the throne. We do not trust the heir presumptive, and I fear that on the death of the Emperor there will be grave disturbances in Hungary, The Emperor is making the situation more acute by listening to men who are reactionary in their policy, and it has been difficult for any of our party to reach the Emperor.

"We have been resigned to the presnt regime, which is not in favor of our party, realizing that the Emperor week ago because of the illness of was not in sympathy with our plans for democracy, and were looking forward with hope to the succession of

the late Archduke. "I knew him personally as a kindhearted, democratic man, who was is terested in the welfare of his people and especially in educational matters

appertaining to Hungary. "I expect to remain here six weeks in high time I shall deliver lecture
